| Bamboo | | 27 oz Bowl | C11-1430 | 500 | \$ 76.76 | \$ 0.15 | |

about us

We extract virgin cellulose fibers from agricultural residues or plants with short life cycle, like bamboo and palm.

Such plant tissues are put into a semi-mechanical pulping system, specially engineered to separate fibers with mechanical actions instead of chemical means.

Absolutely chlorine and sulfur – free, our unique pulping system not only causes minimal environmental hazard, but also minimizes our costs by eliminating pollution charges and expensive chemicals.
